

HR Attrition Dashboard

Business Insights Report | Abhishek Singh Yadav | Data Analyst

1. Project Overview

This report presents key business insights from the HR Attrition Dashboard built in Microsoft Excel using IBM HR Analytics dataset. The analysis helps HR managers and business leaders understand why employees are leaving and what actions can be taken to reduce attrition.

Dataset Summary

Parameter	Details
Data Source	Kaggle — IBM HR Analytics Dataset
Total Employees	1,470
Attrition Count	237 employees left
Attrition Rate	16.1%
Active Employees	1,233
Avg Monthly Income	\$6,502.93
Departments	Sales, R&D, Human Resources

2. Key Business Findings

2.1 Department Wise Attrition

Department	Attrition Count	Risk Level
Sales	Highest	Critical
Research & Development	Medium	Moderate
Human Resources	Lowest	Low

Warning: Sales department has the highest attrition — immediate HR intervention required!

2.2 Age Group Wise Attrition

Age Group	Attrition Level	Reason
18-27	Very High	Career growth seeking
28-37	High	Better opportunities
38-47	Medium	Work-life balance
48-57	Low	Job stability preferred
58-67	Very Low	Near retirement

Key Insight: Young employees (18-27) have highest attrition. Better career growth programs needed.

2.3 Gender Wise Attrition

Gender	Count	Attrition Pattern
Male	150	Higher attrition
Female	87	Lower attrition

Key Insight: Male employees leave more frequently. Targeted retention programs for male employees needed.

2.4 Job Role Wise Attrition

Sales Representatives have the highest attrition among all job roles, followed by Research Scientists and Laboratory Technicians. Senior roles like Managers and Directors show very low attrition.

Warning: High Sales Representative attrition is affecting company revenue directly.

3. KPI Summary

KPI	Value	Benchmark	Status
Total Employees	1,470	-	Good
Attrition Count	237	<150	Critical
Attrition Rate	16.1%	<10%	High Risk
Active Employees	1,233	>1,350	Below Target
Avg Monthly Income	\$6,502	\$7,000+	Below Market

4. Business Recommendations

1. Immediate Action — Sales Department

Sales department needs urgent intervention. Implement incentive programs, clear career paths, and competitive salaries to reduce attrition.

2. Youth Retention Program

Employees aged 18-27 are leaving most. Create mentorship programs, fast-track promotions, and skill development opportunities.

3. Salary Review

Average monthly income of \$6,502 is below market benchmark. A 10-15% salary revision can significantly reduce attrition.

4. Male Employee Engagement

Male attrition is higher than female. Flexible work policies, team building activities, and recognition programs can help.

5. Exit Interview Program

Implement structured exit interviews to understand specific reasons for leaving and take targeted corrective actions.

6. Predictive Attrition Model

Use data analytics to predict which employees are at risk of leaving before they resign, enabling proactive retention.

5. Tools & Techniques Used

- Microsoft Excel — Data Cleaning, Analysis, Dashboard
- Pivot Tables — Multi-dimensional data analysis
- Dynamic Slicers — Filter by Department, Gender, Job Role
- KPI Cards — Attrition Rate, Active Employees tracking
- Pie/Donut Charts — Attrition Overview & Gender Analysis
- Bar Charts — Department, Age Group, Job Role Analysis
